What is an SSL certificate?

SSL stands for Secure Socket Layer. It might sound complex, but it's really not. SSL certificates validate your website's identity, and encrypt the information visitors send to, or receive from, your site. This keeps thieves from spying on exchanges between you and your shoppers.

When you have an SSL certificate protecting your website, your customers can rest assured that the information they enter on any secured page is private and can't be viewed by cyber crooks.

Cost Per Year

\$100.00/year

I will continue to provide the lowest cost. Its possible after the SSL set-up the cost may increase your decrease when renewed. I will keep you updated.
